

COMPLETE PATIENT POSITIONING

FOR EVERY PROCEDURE

Operating Room Accessories

SUPINE POSITIONING

Patient Positioning

AliLite™ Head Donut

Contoured for greater pressure distribution—up to 50% lighter than gel alone

931555

AliLite™ Supine Headrest

Stable support for the head, contoured for greater pressure distribution

931874

Azure Sacral Support

Low-profile dual layers conform to body contours and mimic tissue

924103

Patient Transfers

Patient Roller

Our most popular patient transfer device

9-254 Short

9-729 Med.

9-728 Long

Patient Roller Replacement Cover

Make your transfer device work like new

9-209 Short

9-478 Med.

9-477 Long

O.R. Accessories

Hygienic Donut Cover

Single-patient-use cover helps prevent cross-contamination

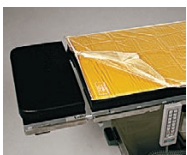

937280

Clark Socket Plus EZ-On

Snaps anywhere along table rail, accepts flat or round posts

937344

Cover for Gel Surface Overlay

Single-patient-use cover helps prevent cross-contamination

925806

Single-Patient-Use Armboard Strap

Safely holds patient's arms in place

936655

Gel Repair Kit

Repairs minor nicks and tears in gel positioners

937981

Mini Surgical Marker (100/case)

Prep-resistant ink helps reduce the risk of wrong-site procedures

933292

Operating Room Accessories

SUPINE POSITIONING

AliGel™ Donut

Reduces pressure while offloading the occipital protuberance

95-118

AliGel™ Armboard Pad

Anti-shear protection for the arm

930239

AliGel™ Ulnar Nerve Protector

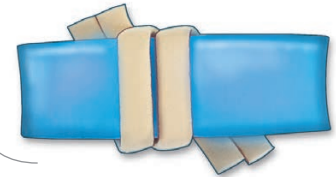

Provides full access to IVs

95-787

A-Line Support Splint

Holds the wrist steady for more consistent insertions

95-985

VeriClean™ Table Strap

Secure patients with the only high-level, fully disinfectable O.R. strap on the market

937065

AliGel™ Dome Positioner

Semi-circular design provides pressure protection under knees

95-116

AliGel™ Torso Surface Overlay

Protects patient's back and sacral area from shear

95-365

Arm Cradle

Single-patient-use foam for nerve protection

930377

Side Rail Mounted Mayo Stand

Secures to the side rail, removing tripping hazards

937343

AliGel™ Heel Cup

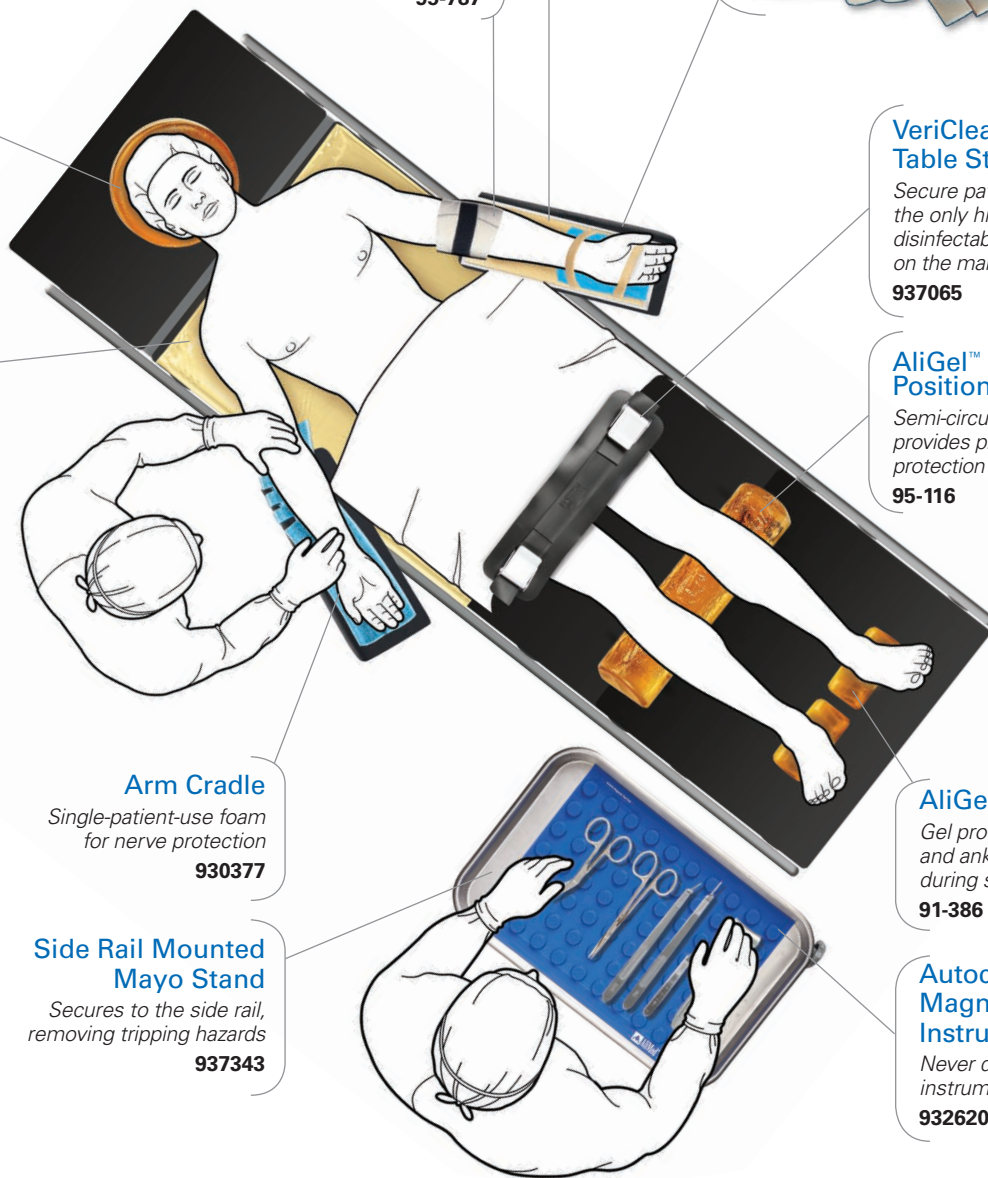

Gel protects the heel and ankle from pressure during surgery

91-386

Autoclavable Magnetic Instrument Pad

Never drop another instrument

932620

Operating Room Accessories

LATERAL POSITIONING

Patient Positioning

Lateral Positioner
Built-in headrest and axillary support assist in proper spinal alignment
931875

AliLite™ Horseshoe
Head protection with reduced ocular pressure risk
931553

AliGel™ Patient Positioning Chest Roll
Protects against excessive pressure on delicate tissues and nerves
91-392 6"W x 20"L
Multiple sizes available

Patient Transfers

Patient Roller
Our most popular patient transfer device
9-254 Short
9-729 Med.
9-728 Long

Patient Roller Replacement Cover
Make your transfer device work like new
9-209 Short
9-478 Med.
9-477 Long

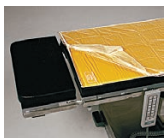

O.R. Accessories

Hygienic Donut Cover
Single-patient-use cover helps prevent cross-contamination
937280

Mini Surgical Marker (100/case)
Prep-resistant ink helps reduce the risk of wrong-site procedures
933292

Cover for Gel Surface Overlay
Single-patient-use cover helps prevent cross-contamination
925806

Autoclavable Magnetic Instrument Pad
Never drop another instrument
932620

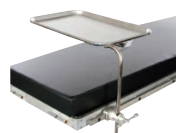

FREEDOM® Clark Socket
Snaps anywhere along table rail, accepts flat or round posts, with marked 5° increments for accessory placement
934725

A-Line Support Splint
Holds the wrist steady for more consistent insertions
95-985

Gel Repair Kit
Repairs minor nicks and tears in gel positioners
937981

Side Rail Mounted Mayo Stand
Secures to the side rail, removing tripping hazards
937343

Operating Room Accessories

LATERAL POSITIONING

AliLite™ Horseshoe

Head protection with reduced ocular pressure risk
931553

Reusable Armboard Strap

Safely keeps patient's arm on the armboard and is easy to clean with disinfectant
931902

AliGel™ Armboard Pad

Anti-shear protection for the arm
930239

Pivoting Armboard

Supports the arm at any angle along the table plane
95-091

AliGel™ Full-Length Surface Overlay

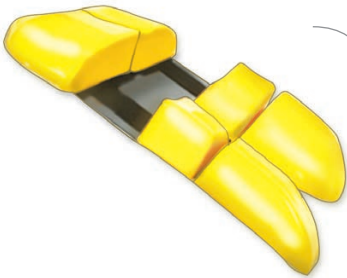

Protects patient's back and sacral area from shear
95-930

AliGel™ Knee Crutch Pad

Protects the knees while in lateral position
95-942

AliGel™ Heel Cup

Gel protects the heel from pressure
91-386

AliLite™ Prone/Lateral Positioner

Promotes proper spinal alignment
932990

Foot Pedal Mayo Stand

Foot pedal allows for easy height adjustment without breaking the sterile field
930526

AliGel™ Heel Protector Pad

Protects the heel and ankle from pressure
95-789

Autoclavable Magnetic Instrument Pad

Never drop another instrument
932620

Operating Room Accessories

PRONE POSITIONING

Patient Positioning

AliLite™ Prone Headrest
Protects optic nerve and facial tissues with room for intubation tube—up to 50% lighter than gel alone
931696

AliLite™ Chest Roll
Allows for proper patient ventilation—up to 50% lighter than gel alone
931557

A-Line Support Splint
Holds the wrist steady for more consistent insertions
95-985

Arm Cradle
Single-patient-use foam for nerve protection
930377

AliLite™ Prone/Lateral Positioner
Promotes proper spinal alignment
932990

Patient Transfers

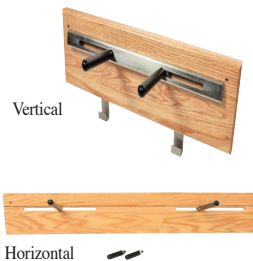

Anti-Stat Patient Shifter
One of our most popular patient transfer devices features an anti-stat coating; Conductive model is embedded with carbon
9-077 Narrow Aqua
9-076 Standard Aqua
9-719 Standard White
9-182 Conductive Black

AliSlide™ Half Shifter
Easily transfer patients in any position—even those with tubes and lines
931827

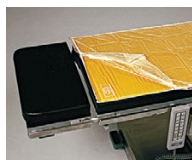

As featured in **Outpatient Surgery**

Wall Hanger
Adjustable pegs accommodate most shifters, allowing for vertical or horizontal storage. Solid oak, clear finish.
9-704 Vertical
75134 Horizontal

PATIENT POSITIONING STRAPS

Disposable Straps

AliStrap® Rolls
The most versatile hook-and-loop positioning strap
95-900 1½"W x 30'L
95-902 3"W x 30'L
95-904 5"W x 30'L
95-908 10"W x 30'L

AliStrap® Precut Straps
Precut for convenience; great for use as armboard straps
926725 1½"W x 30"L, 12/bx
926726 3"W x 30"L, 12/bx
939182 1½"W x 38"L, 12/bx

AliStrap® Soft Rolls
Padded hook-and-loop positioning strap for fragile or sensitive skin
930382 1½"W x 30'L
930163 2"W x 30'L

AliStrap® Soft Precut Straps
Precut for convenience; great for use as armboard straps
926727 1½"W x 30"L, 12/bx
926728 2"W x 30"L, 12/bx
939184 1½"W x 38"L, 12/bx
939206 2"W x 38"L, 12/bx

Universal Straps
Versatile, cut-to-length straps in three configurations
91-281 One-Piece, One-Closure, 2"W x 96"L
932571 One-Piece, Two-Closure, Side-Rail Hold, 2"W x 96"L
91-285 Two-Piece, Three-Closure, Side-Rail Hold, 2"W x 47-76"L

Universal Econo-Straps
Padded, cut-to-length straps for maximum skin protection; great for use as armboard or body straps
7536 3"W x 72"L
7539 4"W x 72"L

Reusable Straps

VeriClean™ Table Straps *The only high-level, fully disinfectable O.R. strap on the market*

VeriClean Mid-Panel Straps
5"W mid-panel distributes pressure over the midsection; for tables with side rails
937065 96"L **937067** 120"L
937066 108"L **937068** 132"L

VeriClean Single Straps
Narrow 2"W strap with single cam-style buckle; for tables with or without side rails
937121 96"L
937122 118"L
937123 132"L

VeriClean Bariatric Straps
10"W mid-panel with four tight-lock buckles accommodates patients up to 1,000 lbs.; for tables with side rails
937678 140"L

Reusable Armboard Straps
Broad surface area reduces pressure points on arm; cleans easily
931902 4"W x 30"L, pr
937546 4"W x 36"L, pr

AliGel™ Surgical Straps
Made with unique gel formula that moves with the patient to reduce skin shear and protect against pressure injuries
939300 Armboard, 2"W x 30"L, ea
931332 Body, 4½"W x 56"L

Radiolucent Abdominal Immobilizers
Heavy-duty, extra-wide canvas helps reduce movement during imaging
9-938 One-Closure, 10"W x 75"L
920259 Three-Closure, 14"W x 72"L

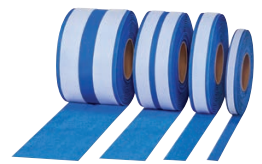

Operating Room Accessories

PATIENT POSITIONING STRAPS

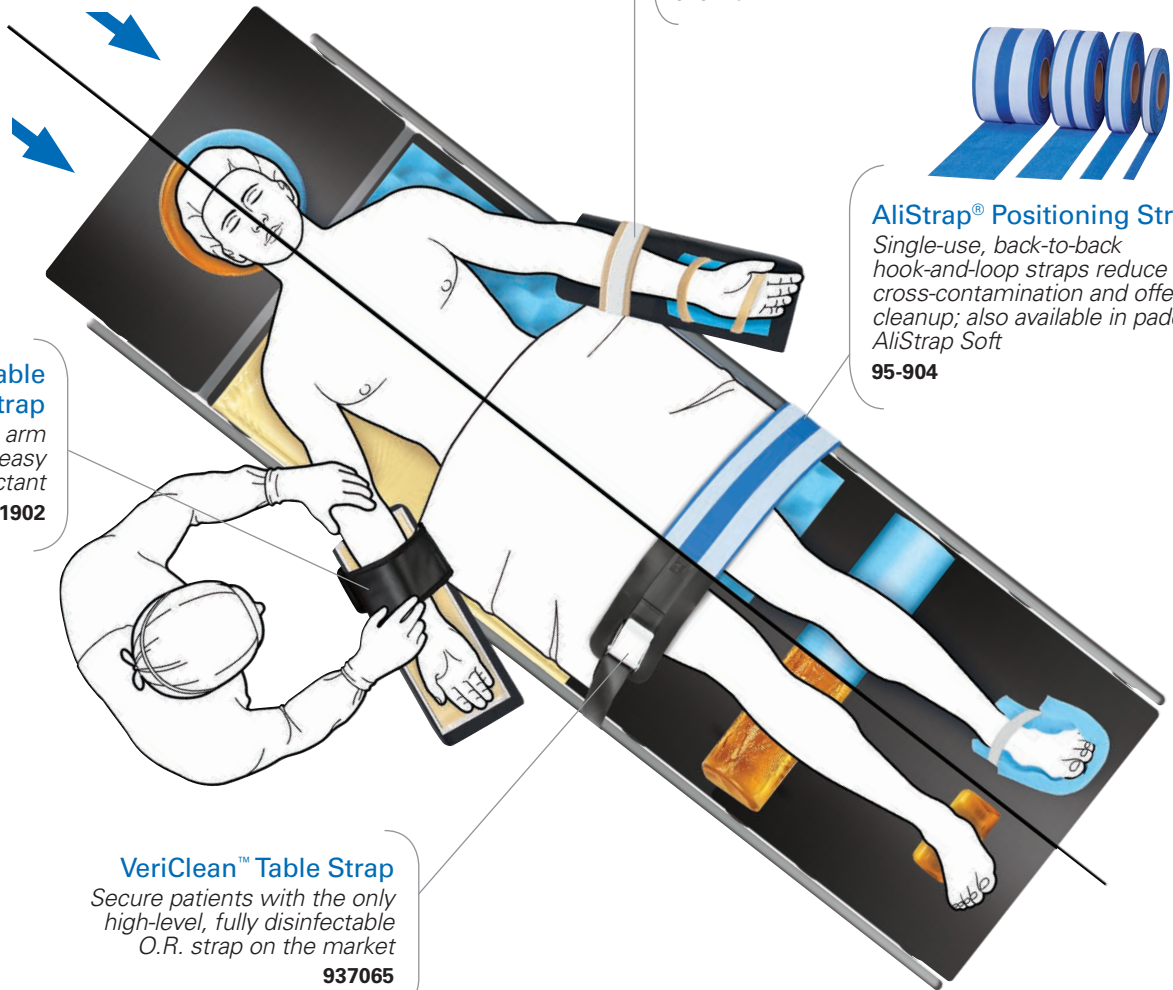

AliStrap® Precut Positioning Strap
Same features as our best-selling rolls (see below), precut for convenience; also available in padded AliStrap Soft
926728

AliStrap® Positioning Strap
Single-use, back-to-back hook-and-loop straps reduce cross-contamination and offer easy cleanup; also available in padded AliStrap Soft
95-904

Disposable Straps

Reusable Straps

Reusable Armboard Strap
Safely keeps patient's arm on the armboard and is easy to clean with disinfectant
931902

VeriClean™ Table Strap
Secure patients with the only high-level, fully disinfectable O.R. strap on the market
937065

Safe Positioning Reduces Injuries in the O.R.

Each year an estimated 1.3 to 3 million adults get hospital-acquired pressure injuries, and up to 66% of these injuries originate in the operating room.¹ Surgical patients are more likely to develop pressure-related injuries due to prolonged periods of patient immobility, poor positioning, compromised circulatory function under anesthesia, and preexisting conditions such as diabetes and obesity.² Nursing care costs and time can increase by 50% for each pressure injury acquired during a surgical procedure,^{3,4} and stage 3 or 4 pressure injuries that occur after hospital admission are “never events” that will not be reimbursed.⁴

AliMed and our clinician partners apply extensive research and design to developing specific solutions to meet the surgical patients’ needs. AliMed manufactures its positioners using premium materials with proven efficacy,⁵ such as silicone and elastomer gels that mimic fatty tissue, expand pressure distribution, and reduce injury risk.

Replenish your inventory today!

Disposable foam positioners reduce cross-contamination risk

To assist with infection prevention, AliMed offers **disposable foam positioners** in kits for easy storage, convenience, and to reduce cross-contamination risks. Additionally, AliMed offers a wide array of reusable foam positioners. **Protecta-Coat™** features an antimicrobial vinyl coating that is impervious to fluids. **InvisiCoat®**, also antimicrobial and fluid-proof, has the added benefit of a curved-edge design to reduce artifacts for cleaner, clearer images. To meet the needs of customers seeking reusable gel for its durability and efficacy during long procedures, AliMed carries AliGel and AliLite. Both leverage viscoelastic polymers, materials recommended by AORN to reduce the incidence of pressure injuries.⁶

Protecta-Coat™ is vinyl-coated and embedded with ionic silver particles

AliGel™ contains an outer surface that is softer than skin

AliGel™—the industry standard in positioning—contains an outer surface that is softer than skin. The underlying gel moves with the patient to reduce shear and evenly distribute pressure. Additionally, AliGel retains its shape better than less dense gel positioners. With more than 100 shapes and sizes, you’ll find a positioner for clinical needs.

InvisiCoat® has a curved-edge design to reduce artifacts for cleaner, clearer images

AliLite™ is a durable gel with a lightweight inner foam core and stable nonskid base

AliLite™, AliMed’s lightest gel positioner, features a durable combination of naturally bacteriostatic silicone gel and lightweight foam with an anti-slip base for stability. Anatomical precontouring facilitates greater conformity between gel and the body’s shape as weight is redistributed over a larger area, reducing the risk of pressure points. More than 50% lighter than comparable gel-only products, AliLite positioners are designed for easier handling by medical staff during patient positioning.

Reduce the incidence of O.R.-acquired pressure injuries by using the most effective pressure relief available. AliMed’s positioning products protect bony prominences and minimize nerve pressure while promoting circulation and respiratory function. Use these products to attain secure access to the surgical site with the least physiological compromise of the patient.
