Eyewash safety stations

Be prepared for an emergency

Every workplace should have an emergency eyewash station for immediate access to sight-saving eyewash solution. Molded in safety green, eyewash stations have four holes and can be wall mounted for quick access when an emergency occurs.

Works in any position

#GC92 3840

#GC92 3875

Scienceware® Emergency Eyewash Station treats eyes in any position, whether sitting, lying down or standing. Universal symbols and multilingual instructions on the station clearly explain usage.

Eye cup bottle stations (empty bottle)

Improved design!

Twist off cap stations (full bottle)

Mirror for quick inspection

Single Eyewash Station contains 32 oz. twist cap bottle filled with sterile, isotonic, buffered solution. 17½" x 15". Screws included.

#GC92 3871 Eyewash Station.....\$51.00 ea

Double Eyewash Station contains two 32 oz. twist-cap bottles filled with sterile, isotonic, buffered eyewash solution. 18" x 14". Screws included.

#GC92 3743 Eyewash Station.....\$61.25 ea

Sterile Eyewash Solution Refills 32 oz. sterile solution helps rinse away chemical contaminants and other harmful irritants. Similar in pH value to human tears, the solution is isotonic, and will not damage eye or skin tissue during prolonged flushing. Individually packaged bottles for one-time use.

#GC92 7833 Refills, 32 oz.\$17.50 ea

Antimicrobial privacy curtains

Cross-contamination protection

Polyester curtains protected with Aegis Microbe Shield™ technology. Shield technology has been tested and proven to eliminate pathogens including Staph, MRSA, VRE, and Aspergillus Niger. Shield is the only fabric that eliminates bacteria, resists stains and fungi, and acts like an air filter. All curtains are made to order, in the Kensington pattern, and come with or without mesh tops. NFPA 701 compliant.

Privacy curtains carry C. diff.

According to the *Cleveland Plain Dealer* and *Chicago Tribune*, researchers at Cleveland's Veterans Administration Hospital have learned that the dangerous bacteria known as Clostridium difficile (C. diff) is commonly found on privacy curtains. Health care workers who touch the curtains can easily transmit the bacteria to patients.

The study found 42 percent of the curtains tested were infested with C. diff. The Centers for Disease Control and Prevention estimates more than 15,000 patients die each year because of C. diff complications and up to 7,000 hospital patients are infected each day with C. diff.

Many facilities have hand-washing protocols in place, but how often are the curtains washed? Changing the curtains every time a patient is discharged is costly and time consuming. Choosing privacy curtains that are resistant to MRSA, VRE, Aspergillus Niger, and other dangerous bacteria is the smart choice.

Call Christina Griecci at 800-225-2610, x-106 for fabric samples and pricing. #GC9-999NP

These antimicrobials

Stop spreading germs!

Staff can often expose residents to additional infections and ailments. We carry an extensive line of products to curb this practice. Residents in your facility should feel safe—they shouldn't worry about being exposed to bacteria-carrying privacy curtains or scrubs.

Luckily, AliMed has you covered. From antimicrobial curtains and keyboards to positioners and scrubs, all of these products stop the spread of MRSA, HIV, VRE, and many more diseases and bacteria.

safe and cost effective

Complete face protection

Coveralls conform to the CDC's recommendations and requirements for eye and face protection to help guard against viral or bacterial contaminants. Lightweight for comfort, disposable, antifog coating won't wear off, optical-grade film—no visual distortion, fit over glasses, fluid-resistant.

Combo® Shield combines full eye protection with 95%+ bacterial filtration efficiency. Fluid-resistant. One-piece construction. Tie-back or ear-loop. Lightweight—just 0.35 oz. each.

Coverall® and 1/2 Coverall® Face Shields provide large-shield protection, replacing inefficient goggles. One size, with trim-lines to allow adjustment of shield length. Individually wrapped. Coverall, 0.86 oz. each; 1/2 Coverall 0.55 oz. each. 25/box.

Lightweight anti-fog shield

Silver Shield™ Mask

meets or exceeds the filtration standard for NIOSH

N95 designation and the standards for workers treating airborne diseases set by CDC and the WHO. The sustained release of silver ions creates a favorable environment by protecting the mask from bioaccumulation of pathogens, which regular masks can actually encourage by providing the ideal warm, moist environment for them. 20/box.

3M Aseptex Molded Surgical Mask

Fluid-resistant, general purpose mask. Soft and lightweight. Slips on quickly and easily. Blue. 50/box.

#GC98MAS1-1 Mask\$16.75 bx

Citrus II Hospital Gericide
