Medication Cups and Lids (sold separately)

From pill to powder...in only a few seconds!

Severo Electric Pill Grinders Patients often have difficulty swallowing pills, but manually grinding medication can be time-consuming, physically difficult, and can put healthcare staff at risk of inhaling aerosols. The Severo Electric Pill Grinder is a quick, easy, and safe way to grind pills, featuring a portable design and near silent crushing. Electric grinding saves time and eliminates physical strain while the closed compartment reduces the risk of spills, cross-contamination, and exposure to medication dust. Perfect for any healthcare facility, including hospitals, nursing homes, and home-care organizations.

Quick, easy, and safe to use: Put medication in the Severo Medication Cup, place Grinding Sheet then metal grinding head on top, position the cup in the grinder compartment, close the lid, and within seconds the medication is available in powder form. Powdered medication can then be mixed with a liquid or gel to help facilitate medication intake and is also ideal for administering via feeding tubes.

Accessories sold separately:

- **Severo Medication Cups** for use during grinding
- **Severo Medication Lids** seal the cup, minimizing spills and contamination risk during storage or medication distribution
- **Severo Anti-Contamination Dividers/Grinding Sheets** made of durable cellophane keep the grinding head clean and help prevent cross-contamination, saving cleaning time after each grinding cycle
- **Stability Plate** provides a stable base when grinding
