

# Common Problems

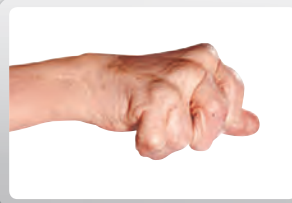

# Useful Solutions

# Table of Contents

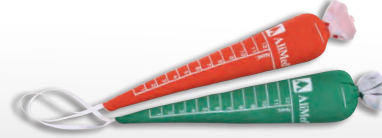

For nearly 50 years, AliMed has been at the forefront of providing innovative yet practical solutions to the common problems staff experience everyday with long-term care residents.

## Problem:

Patients with severe hand contractures experience intense pain when hand is pried open for routine hygiene or during corrective splint placement.

## AliMed® Solutions:

**Therapy Carrot™** .....p. 4

Muscle weakness or imbalance caused by stroke or upper body injury leads to painful subluxation, contracture, or poor joint alignment.

**Hemi-Shoulder Slings** ..... p. 5

Patients with fragile skin are at a high risk of skin breakdown due to contact with hard surfaces, or from friction or shear incurred during repositioning.

**Arm and Leg Sleeves** .....p. 6

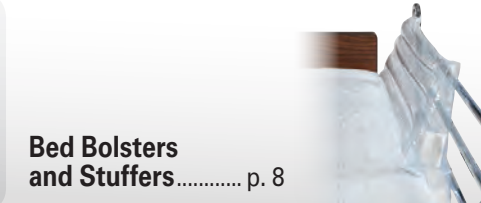

Immobile patients with lower extremity weakness are at an increased risk of developing secondary injuries due to pressure, cross-legged positioning, or footdrop.

**MultiBoot Xtra™** .....p. 7

Restless or agitated patients are at risk of danger zone injuries such as bed gap entanglement/entrapment or trauma from contact with bed rails or head/footboards.

**Bed Bolsters and Stuffers**..... p. 8

Patient needs to be transferred but slings or gait belts are soiled, contaminated, or not readily available, prompting staff to either abandon their no-lift protocols or use contaminated equipment that poses an infection control risk.

**Gait Belts and Lifter Slings**.....p. 9

## Problem:

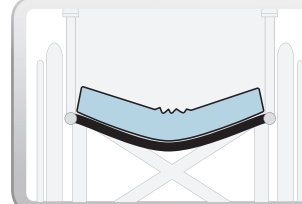

High-fall-risk patients with memory or cognitive issues inadvertently stand without securing their wheelchair brakes, allowing the chair to roll away and putting themselves at risk of serious injury.

## AliMed® Solutions:

**Anti-Rollback System**..... p. 10

Sagging wheelchair seats make traditional flat-bottom cushions ineffective for pressure relief while causing instability, poor posture, and forward sliding.

**Solid Seat Insert™** .....p. 11

Traditional wheelchair cushions used on sagging seats can buckle or tilt, causing forward sliding or slouching that creates dangerous shear forces and pressure.

**Sit-Straight™ Cushions**.....p. 12

The surface of a traditional wheelchair cushion remains static as the patient slides forward from fatigue or weakness, causing subcutaneous tissue damage, resulting in debilitating and costly pressure injuries.

**T-Gel™ Cushions**..... p. 13

Patients with weakness or limited mobility tend to slump, side lean, or slide forward, leading to poor posture, increased health risks, and less functional independence.

**Geri-Chair Positioners** .....p. 14

Wheelchair cushions are often lost or misplaced when wheelchairs are folded and stowed away, requiring staff to spend time searching for or purchasing replacement cushions.

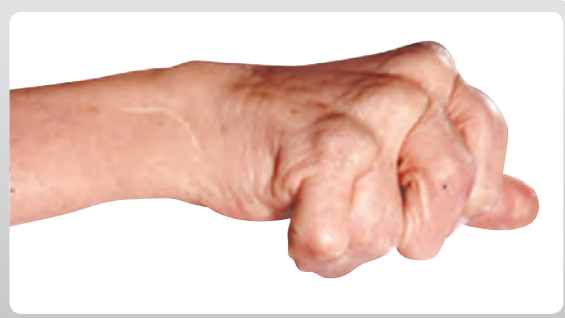

**Stay-Put™ Cushions** .....see back cover

**Problem:**

Patients with severe hand contractures experience intense pain when hand is pried open for routine hygiene or during corrective splint placement.

**Solution:**  
**AliMed® Therapy Carrot™**

Use for hand contractures only

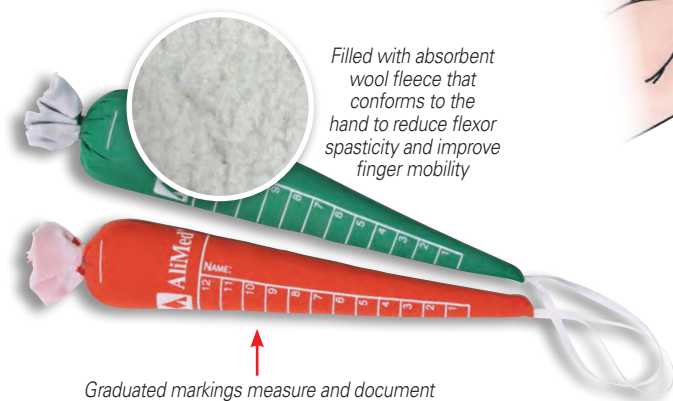

- Painlessly positions severely contracted hands, providing caregivers with easier access to the hand to allow for daily skin care, help prevent nail puncture injuries, and control infection risk while monitoring progressive contracture reduction

Smooth cotton cover • Washable, absorbent wool fleece filling  
• Hand-wash in cold water and air-dry • Kit contains: two carrots/magic wands, laundry marker, and instruction manual • Made in the USA

Sizing: Color-coded by size. **Small (Orange):** 8½"L, 5" maximum circumference. **Large (Green):** 9"L, 5½" maximum circumference.

#JJU51024	SMALL, ORANGE	\$67.75 kit
#JJU51025	LARGE, GREEN	\$67.75 kit

65 California residents, see below.

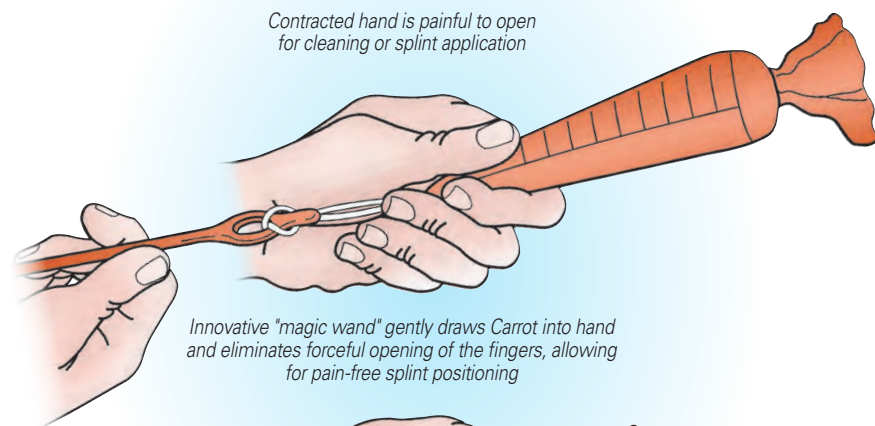

Filled with absorbent wool fleece that conforms to the hand to reduce flexor spasticity and improve finger mobility

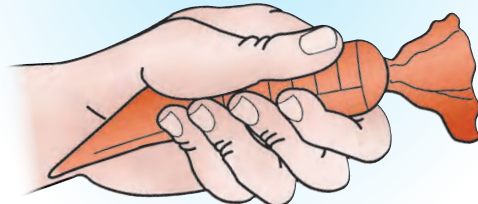

Graduated markings measure and document improvements in range of motion

Contracted hand is painful to open for cleaning or splint application

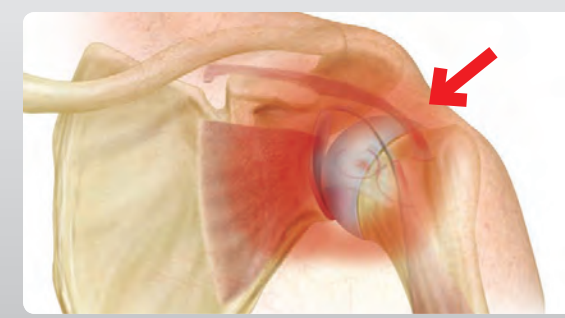

Innovative "magic wand" gently draws Carrot into hand and eliminates forceful opening of the fingers, allowing for pain-free splint positioning

Contracted fingers are now positioned away from the palm, protecting skin from infection risks, including moisture, pressure, and nail puncture injuries

**Problem:**

Muscle weakness or imbalance caused by stroke or upper body injury leads to painful subluxation, contracture, or poor joint alignment.

**Solution:**  
**AliMed® Hemi-Shoulder Slings**

- Unique shoulder saddle transfers arm weight to the scapula, reducing painful subluxation of the shoulder and humeral joint while maintaining full ROM and preventing potential contracture

Saddle: High-density polyethylene and Plastazote® foam  
• Cuff: Polyester foam laminated to hook-receptive polyester fabric • Adjustable hook-and-loop straps • Wear over or under clothing • Made in the USA

Sizing: Measure arm circumference at widest point of biceps. Round up if between sizes.

SIZE	CIRC.	LEFT	RIGHT

Patent #5,403,268

65 California residents, see left page.

Three adjustable fixation straps allow for correction of muscle imbalance and internal or external rotation as needed

**Other Solutions:**

**AliMed® Ultimate Grip Splints**

- Malleable aluminum core makes splinting easier by bending to fit the angle of contracture, positioning the hand and wrist for optimal contracture management

One size • Aluminum shell • Hook-and-loop closures  
• Terrycloth/foam laminate cover • Includes 1½"- and 1¼"-diam. Ethafoam cylinders for incremental finger extension • Made in the USA • Beige

#JJU510841	ULTIMATE GRIP SPLINT	\$63.00 ea
#JJU510842	REPL. SOFT GOODS w/LAUNDRY BAG	\$40.75 set

Use for hand/wrist contractures

Ideal for use after treatment with the Therapy Carrot™

Shop more styles and options online at [AliMed.com](http://AliMed.com)

**AliMed® Antimicrobial-Treated Blue Carrots**  
Reduces odor-causing bacteria  
#52274

**AliMed® Inflatable Carrots**  
Ideal for the most severe hand contractures  
#51598

**AliMed® Turnbuckle Wrist Orthoses**  
Reduces wrist flexion contractures  
#52395

**AliMed® Turnbuckle Ankle Orthoses**  
Adjusts for inversion/eversion and flexion/extension  
#66426

**Other Solutions:**

**AliMed® Turnbuckle Elbow Orthoses**

- Turnbuckle adjusts the angle of the splint for elbow extension or flexion, helping to maintain gains in ROM by applying tension in opposition to contracture force

Rigid Kydex® splint shell • Two-piece, hand-washable T-Foam™ padded liner • Adjusts from 110° flexion to full extension • Heat-adjustable • Fits left or right arm • Made in the USA

Sizing: Measure circumference at belly of forearm and biceps.

#JJU52396 \$183.75 ea

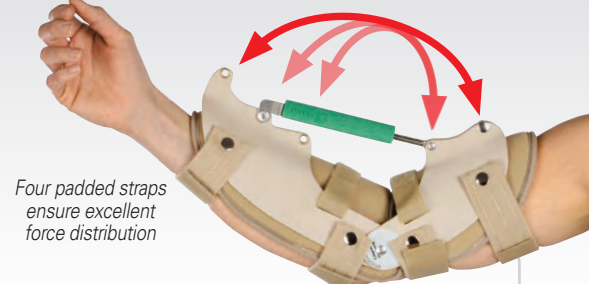

Must be used under a physician's supervision.

65 California residents, see left page.

Padded toe plate keeps pressure and friction off of toes

Flat, nonskid toe-plate attachment knob provides a safe transfer point for pivot or step transfers—remove knob for a flat base to help prevent falls during unaided transfers

Generously padded straps hold foot securely in place and protect shin and foot

Breathable, moisture-wicking liner keeps fragile skin cool and dry, reducing skin breakdown

Rigid shell holds foot in neutral, helping to prevent footdrop

**Rigid shell option**

Additional calf padding safeguards the Achilles region and fully suspends heel for optimal air flow, wound healing, and pressure relief

**Other Solutions:**

**AliMed® Heel and Elbow Protectors**

- Generous padding for sensitive, bony prominences, shielding against bumps, bruising, and pressure injuries

Machine-washable • Acrylic/nylon/spandex • Not made with natural rubber latex

**Problem:**

High-fall-risk patients with memory or cognitive issues inadvertently stand without securing their wheelchair brakes, allowing the wheelchair to roll away and putting themselves at risk of serious injury.

**Solution:**

**Anti-Rollback System**

- Weight-sensitive braking mechanism automatically locks rear wheelchair wheels when patient stands, helping to reduce incidents of harmful falls for high-fall-risk patients or those with diminished mental capacity

Fits wheelchairs 16"-20"W • Alarm requires 9V batteries • Made in the USA

Caution: Only for sling-seat wheelchairs. Periodic inspection is necessary to ensure proper adjustment.

#JJU65333 ANTI-ROLLBACK SYSTEM \$284.25 ea  
#JJU65338 w/ALARM \$369.75 ea

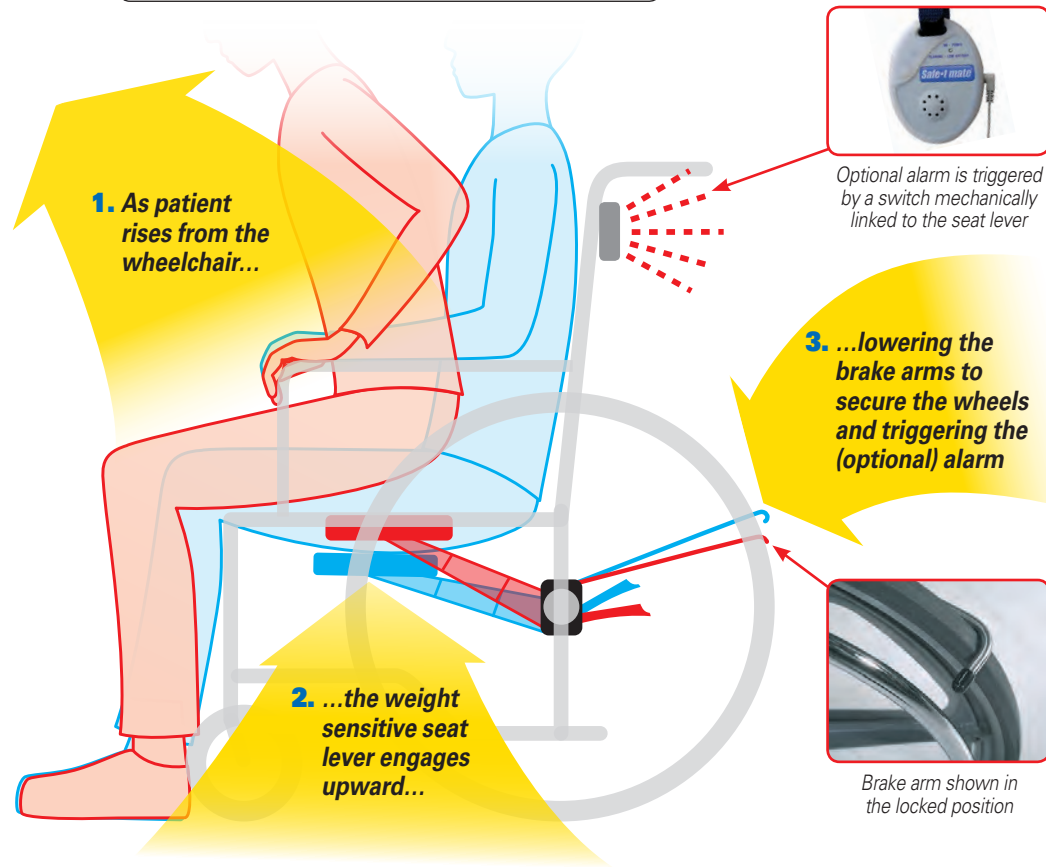

65 California residents, see below.

Lift the temporary override lever to disengage the braking system and move the wheelchair

**Bariatric model available online**

Red: Engaged (not seated) Blue: Disengaged (seated)

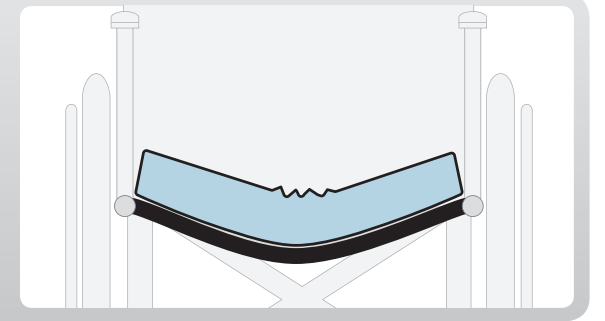

Optional alarm is triggered by a switch mechanically linked to the seat lever

Brake arm shown in the locked position

**Problem:**

Sagging wheelchair seats make traditional flat-bottom cushions ineffective for pressure relief while causing instability, poor posture, and forward sliding.

**Solution:**

**AliMed® Solid Seat Insert™ (SSI)**

- All-in-one foam block with flat top and convex base fills gaps in sagging sling seats to form a level sitting surface that prevents sacral sitting and side-to-side tilt, improving posture, balance, and weight distribution

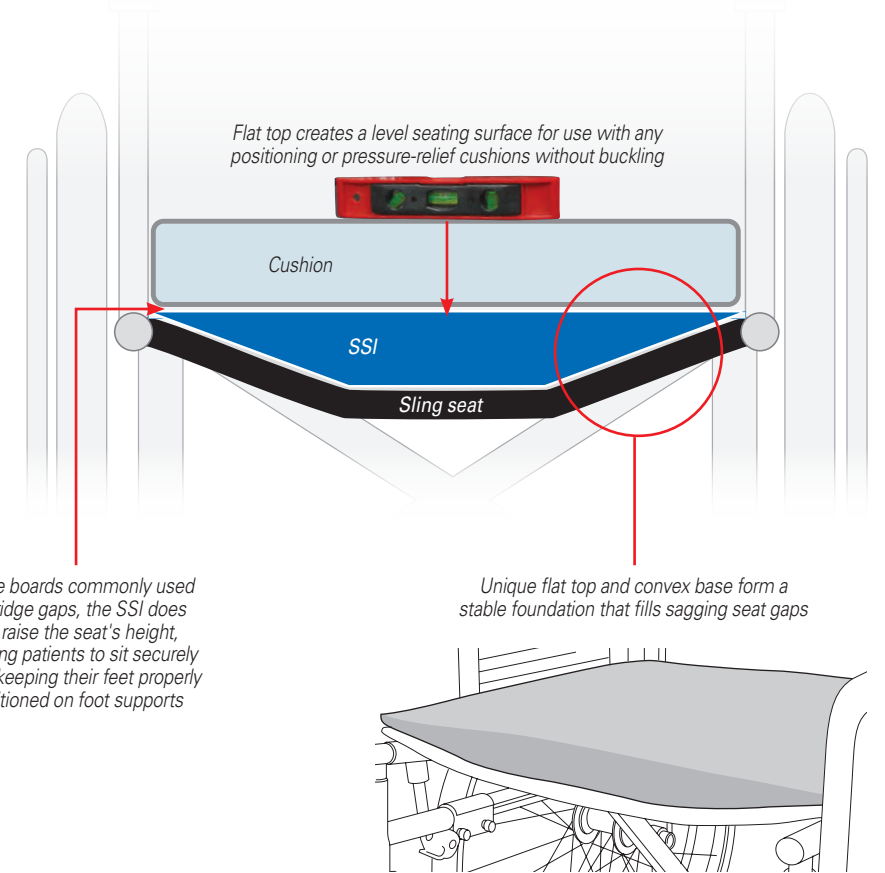

1½" thick (center) • Closed-cell foam • Waterproof • Wipe clean • Made in the USA • Vinyl Cover: no-slip vinyl w/rear safety ties • Grey

UNCOVERED, COATED

**AliMed® Sit-Straight™ Cushions with T-Gel™**

- Integrated solid seat base with top layer of checkerboard T-Gel for maximum shear reduction and pressure redistribution

4 1/2"H tapers to 3 3/4"H rear • Firm Polyfoam with 3/4" Checkerboard T-Gel top layer • Removable cover: black, wipe-clean, water-resistant, nonskid bottom, fully launderable • Rear ties • Made in the USA

#JJU11009	18"W x 16"D	\$187.25 ea
#JJU11010	16"W x 16"D	\$190.50 ea

65 California residents, see below.

**Solution:**

**AliMed® T-Gel™ Cushions**

- Low-profile T-Gel pad made of a soft, rubber-like elastomer gel mimics skin-protecting fatty tissue, moving with the skin to minimize the effects of friction and shear while reducing the formation of pressure injuries
- Gel will not leak or dry out if accidentally punctured or cut
- T-Gel™ Plus Cushions include a bottom layer of slow-recovery T-Foam™ to evenly allocate coccyx pressure, maximizing pressure distribution

**Shear-reducing gel options:**

**Smooth—Basic Relief**  
Moves with the skin to minimize the effects of skin shearing

**Checkerboard—Maximum Relief**  
Independent cells offer better reaction to patient movement and greater air circulation

**T-Gel™ Plus Cushions**

California Proposition 65 Statement  
65 WARNING: This product can expose you to chemicals including Di(2-Ethylhexyl) Phthalate (DEHP), which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

**Problem:**

Patients with weakness or limited mobility tend to slump, side lean, or slide forward, leading to poor posture, increased health risks, and less functional independence.

**Solutions:**

Grey Sure-Chek® thermoplastic side is fluid-proof and flame-resistant

Blue peachskin fabric side is super soft and fluid-resistant

**AliMed® Geri-Chair Comfort Seats**

- Fully padded, reversible chair seat helps prevent sliding and leaning, keeping patient properly and comfortably positioned to protect fragile skin and help reduce pressure injuries

18"W x 72"L • Fits chairs 18"-24"W • Antimicrobial • Hypoallergenic microfiber fill • Sure-Chek fabric meets CAL 117 • Fully launderable • Attaches with three adjustable buckled straps • Made in the USA

#JJU710396 \$135.75 ea

65 California residents, see below.

**Soft Trunk Supports**

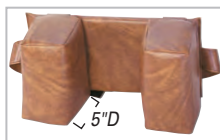

- Plush foam top and bottom extensions help prevent side leaning and sliding, maintaining upright position for improved circulatory function and reduced tissue trauma

18"W x 25"H • 10"L top extensions • Vinyl-covered foam • Wipes clean • Attaches with hook-and-loop straps • Made in the USA • Mauve

#JJU1377 w/10"L BOTTOM EXTENSIONS \$279.75 ea

#JJU1379 w/20"L BOTTOM EXTENSIONS \$285.75 ea

Additional shipping charges may apply. 65 California residents, see below.

Full-depth support offers secure head positioning

**AliMed® Padded Head Supports**

- Fully adjustable, full-depth lateral supports position head properly for feeding and other care activities

Overall: 14"W x 7½"H • Supports: 4"W x 7½"H x 5"D • Attaches with 12½"L hook-and-loop straps • Foam-padded plywood back with Naugahyde® upholstery • Wipes clean • Fits high-backed wheelchairs, geri-chairs, or extended-height back supports • Made in the USA

#JJU1803 \$178.00 ea

65 California residents, see below.

**Geri-Chair Foot Cradles**

- Helps prevent feet from slipping off sides of footrests, ensuring proper placement and helping to control footdrop

Foam padded • Vinyl cover wipes clean • Made in the USA

#JJU703430 \$141.00 ea

65 California residents, see below.

**Problem:**

Patients with visual cognitive impairments have difficulty seeing like-colored foods against like-colored dishware, which makes food hard to identify and unappealing, leading to reduced intake and overall poor nutrition.

**Solution:**

**AliMed® Assistive Dining Plates**

- High-contrast red color makes food more visible and visually appealing, helping to stimulate the appetite, improve food intake, and promote dining independence

8¾" diam. • Polycarbonate construction • Freezer-, microwave-, dishwasher-safe • Made in the USA

**A. 3-COMPARTMENT DIVIDED PLATE**

#JJU83192 EA \$11.25 ea

**Problem:**

Patient rooms are not thoroughly cleaned during or between patient stays, increasing the risk of patients contracting a potentially dangerous and costly healthcare-acquired infection.

**Solution:**

**SaniGuard® Total Release**

- Sanitizes an entire room in 15 minutes, effectively killing 99% of harmful pathogens in hard-to-reach areas, reducing the risk of cross-contamination between patients and staff

3-oz. can treats up to 125 sq. ft. • 8-oz. can treats up to 625 sq. ft. • 36-mo. shelf life • Made in the USA • 12/cs

#JJU71824 3-oz CAN \$105.75 cs

## Problem:

Wheelchair cushions are often lost or misplaced when wheelchairs are folded and stowed away, requiring staff to spend time searching for or purchasing replacement cushions.

297 High Street, Dedham, MA 02026

OR CURRENT OCCUPANT

PRESORTED  
STANDARD  
U.S. POSTAGE  
**PAID**  
AliMed® Inc.

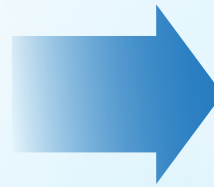

©2019 AliMed® Inc. All rights reserved. Printed in USA. Specifications, prices, and availability subject to change without notice. \$1.50

## Never lose a cushion again!

In storage

Stow wheelchair at night  
and cushion is still there  
in the morning

In use

## Solution:

### AliMed® Stay-Put™ Cushions

- Hinged design with securing strap allows cushion to fold with the wheelchair and "stay put" when chairs are stowed, minimizing cushion loss or need for costly replacements
- When wheelchair is re-opened, the cushion folds flat and is properly positioned on the seat

### Available in:

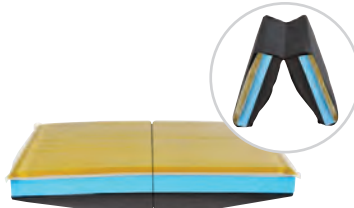

#### T-Foam™ Stay-Put

- Slow-recovery T-Foam™ molds to body contours for optimal pressure redistribution while open-cell structure prevents heat buildup

2"H • medium T-Foam • Removable cover

#JJU10952 16"W x 16"D \$121.75 ea  
#JJU10953 18"W x 16"D \$121.75 ea

**65** California residents, see below.

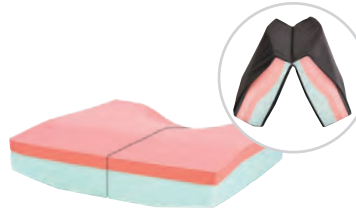

#### T-Gel™ Stay-Put

- T-Gel topper moves with the skin to minimize shear while slow-recovery T-Foam™ layer molds to body for superior support and pressure relief

3"H • Removable cover

#JJU10956 16"W x 16"D \$232.75 ea  
#JJU10957 18"W x 16"D \$232.75 ea

**65** California residents, see below.

#### Sit-Straight™ with Coccyx Stay-Put

- Integrated solid seat base combined with soft top layer of slow-recovery T-Foam™ and rear coccyx cutout for maximum pressure relief

3"H • Removable cover

#JJU10954 16"W x 16"D \$140.75 ea  
#JJU10955 18"W x 16"D \$140.75 ea

**65** California residents, see below.

#### AeroCell™ Stay-Put

- Single-valve, individual air cell design delivers the same pressure to each cell, offering effective pressure redistribution

2"H • Removable cover

#JJU10960 16"W x 16"D \$302.00 ea  
#JJU10961 18"W x 16"D \$302.00 ea
