## Digitally manage your radiation protection at no extra cost!

***It's as easy as:***

***Scan it*** – Quickly view inspection history for Joint Commission compliance

***Track it*** – Easily find inventory reports for on-hand aprons

***Replenish it*** – Immediately replace failed aprons or restock right from your device

SMARTID is available on AliMed Grab 'n Go™ and Perfect Fit™ Aprons

See reverse for details

## How it works:

**Scan with your phone:** While other systems require external software or RFID tags, all you need is your mobile device. Each apron is assigned a unique QR code—simply scan it to view a web-based record of that item from your desktop, tablet, or phone.

**Track products online:** From this record, you can track your apron history and quickly review inspection reports—all in the same database, with no special software necessary.

**Restock and replace:** Easily access inventory details on each apron to immediately replenish your stock or replace failed aprons as needed.

## Available on these AliMed Aprons:

### Grab 'n Go™

- Ships same day
- Color-coded sizing for easy identification
- Economical option

### Perfect Fit™

- Tailored-Fit sizing option
- 400+ colors and prints
- Monogramming
- ...all at no extra cost!
