

The development of pressure injuries can have a considerable economic impact on facilities, often requiring an increase in care, length of stay, and overall burden on caregivers:¹

1. <https://www.ahrq.gov/professionals/systems/hospital/pressureulcertoolkit/putool1.html>

- Patients affected: **2.5** million per year
- Total cost: **\$9.1** to **\$11.6** billion per year
- Cost of individual patient care: **\$20,900** to **\$151,700** per pressure injury

Reusable vs Disposable

Gel

- Bacteriostatic
- Impervious to fluids
- Cost effective – stands up to repeated use
- Easy to clean
- Available in AliLite Gel – up to 50% lighter than regular gel

Foam

- Single-use
- Ideal for short procedures
- Economical
- Radiolucent
- Light and easy to handle
- Available in a variety of sizes and shapes to meet your individual needs
