

INTRODUCING!
New AliGuard model

Premium features at an economical price

Free of powder, latex*, and lead

Our **NEW** premium AliGuard Glove provides higher attenuation and excellent dexterity at a lower price than leading models

*Not made with natural rubber latex.

- Ultra-thin formulation preserves dexterity, sensitivity, and flexibility

- Curved fingers offer greater precision and less fatigue

- Choose premium AliGuard or economical Original

AliMed Radiation Attenuation Glove Family

Both gloves provide high attenuation and excellent tactile sensitivity without harmful skin irritants such as powder and natural rubber latex, reducing allergens for complete hand protection. Curved fingers help lessen fatigue during procedures and a coated interior makes them easy to don. Lead-free material requires no special disposal for a cost-effective and environmentally friendly alternative to traditional leaded models.

AliGuard Our new premium glove is our highest attenuation model, offering superior protection with finely textured fingers and palm for a better grip on delicate instruments—all at a lower price than other comparable models.

Original Our tried and true, the Original is our most economical glove without sacrificing attenuation or tactile sensitivity.

See reverse for details and ordering.
