Multiple heights.
Multiple applications.

Durable leather cover
Simply peel layers to adjust height
For plantar fasciitis, Achilles tendonitis, and more

Adjustable Heel Lifts
Simply peel one or two layers at a time to adjust height precisely to your patient. Set to $\frac{3}{8}''$, $\frac{1}{4}''$, or $\frac{1}{6}''$. Durable leather cover with three resilient $\frac{1}{8}''$ rubber layers are tapered for comfort. Layers are firmly held together by peel-apart adhesive. Use bilaterally for progressive treatment of plantar fasciitis or Achilles tendonitis. Use with a post-op shoe to eliminate the pelvic obliquity caused from the difference in leg length.

Sizing: S fits most Wmns shoe sizes; M fits larger Wmns and smaller Mens shoe sizes; L fits most Mens shoe sizes.

Ordering Information
#60404 Heel Lift, each
#64444 6/kit, one size
Specify size.

One lift treats:

- Leg-length discrepancy
- Pelvic obliquity
- Plantar fasciitis
- Achilles tendonitis

Contoured support achieves ½” lift

Leg-Length Lifts ½” lift compensates for length discrepancies. Other lifts achieve only ¼” or ⅛” lift and don’t support the arch, putting dangerous pressure on metatarsal heads. Lifts support by approximating normal plantar contours of hind and midfoot. Use bilaterally for plantar heel pain or Achilles tendon problems. Use on opposite leg to improve gait immediately following total hip replacement. Flexible molded polyurethane. One Left or Right per package. Black.

Sizing: S, Wmns 5-6½; M, Wmns 7-11, Mens 6-10; L, Wmns 12+, Mens 10½+.

Easily measure leg-length discrepancies

Adjustable Height Shoe Lifts are used to measure leg-length discrepancies. Use a variety of thicknesses to obtain correct height. Adjustable hook-and-loop straps secure foot to shoe lifts. Five color-coded foam lifts (¼”, ⅛”, ⅛”, ½”, 1”) for easy identification of height. Black ⅛” top and ¼” bottom sole.

Color-coded lifts simplify height adjustment
