

Controlled food delivery allows safer intake

■ **Best alternative
to syringe feeding**

■ **Improves comfort
level and safety**

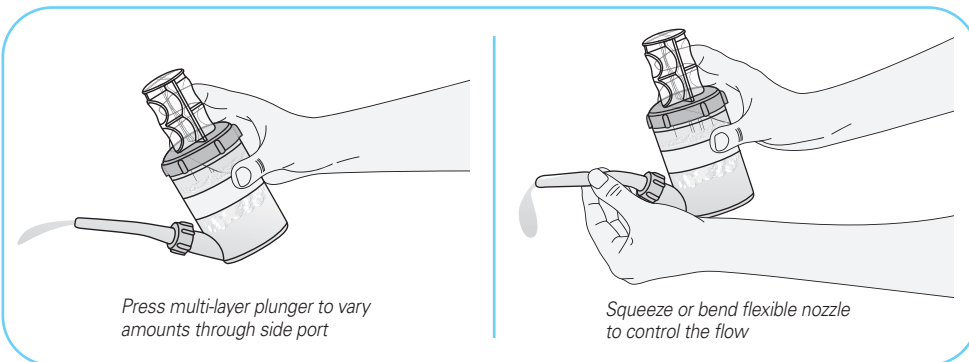

Feeding Assistant

This dysphagia feeding aid delivers thickened or pureed food to clients not yet ready to be spoon-fed. The Feeding Assistant offers a safer and more comfortable feeding experience by allowing the caregiver to control the pace at which the food is delivered. The 8-oz. cup holds a full serving, and the caregiver applies the necessary level of pressure to the multi-layer plunger, pushing the desired amount of food through the nozzle. The flexible, 5½"-long nozzle can be squeezed or bent to further individualize the pace of food entering the mouth.

Clear plastic. Disassembles for easy cleaning. Institutional dishwasher-safe.

Ordering Information:

#82320 Feeding Assistant
#82 32002 Feeding Assistant, 2/pk
#80861 Additional Tubes, 2/pk

Press multi-layer plunger to vary amounts through side port

Squeeze or bend flexible nozzle to control the flow
