

The Right Strap. Right Length. Every Time!

*For at-risk skin,
neonatal to geriatric.
AliStrap Soft!*

- **Skin-safe, soft edges, won't adhere to skin**
- **Strong back-to-back, hook-and-loop closure**
- **Two styles, six widths—cut to any length**

AliStrap and AliStrap Soft

All-purpose positioning straps feature a self-adhering, back-to-back hook-and-loop closure that does not leave behind sticky, bacteria-trapping residue—making them ideal for securing, immobilizing, or positioning patients, equipment, and more.

Low-profile, medical-grade hooks and non-abrasive soft edges will not cut into or abrade skin, instead yielding and flexing against soft tissue to reduce subcutaneous shear. **AliStrap Soft** combines the strength and security of AliStrap with a softer, fully padded surface that is gentler against the most vulnerable and sensitive skin.

Economical and disposable, these straps are perfect for single-use, preventing cross-contamination and offering easy cleanup. Simply cut any length from the continuous 30'L roll, wrap, and press together to form a tight, strong bond—even holds when wet.

To order, see reverse side.
