

# Patient Room Safety

## In-room solutions for patient safety

Successful patient safety programs start with preventative measures. In-room safety devices are critical additions to any comprehensive Fall Management program, providing an additional layer of security for patients and caregivers.

### Non-Alarmed Fall Mats

- Help cushion falls
- Help prevent serious injury

### Edge Protection

- Covers sharp corners
- Cushions hard edges

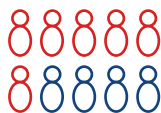

### Trip Prevention

- Use wireless night lights and cordless motion sensor lighting
- Use anti-slip mats

### Bed Rails

- Prevent accidental rolling out of bed
- Promote safer, easier bed mobility

**6 in 10 people with Alzheimer's will wander**

### Wandering Deterrents

- Use easily recognizable Stop Signs
- Utilize alarms and sensors

**Essential products to help prevent falls, tripping, wandering, and other fall-related injuries**
